Core Competencies

JavaScript | Node.js | MySQL | React | MongoDB | AWS | Git | Bootstrap | HTML | CSS

Projects

Console.log | Forum App

Created a forum web Application where users can share thoughts, questions and answers about specific coding issues.

- Used the React framework to build a modern UI on a scalable frontend architecture.
- MongoDB and the Mongoose ODM for the database
- AJAX for retrieving, adding, updating, and deleting data

4 ANIME ARCHIVE | ANIME SEARCH APP

Developed a web application that allows users to search for their favorite animations. Users can also save records to their personal library and share their favorites list with friends.

- Node.js and Express.js to create a RESTful API
- MySQL and the Sequelize ORM for the database

Pair Up | Food Searching App

Developed a web application that allows users to search for their favorite foods, recipes, and ingredients. Users can also save recipes for later, and select drinks that go well with food through a drink recommendation system.

- Built with various server-side APIs to provide better integration.
- Designed and implemented a user interface using Javascript, HTML, and CSS which allowed a user to save their results.
